## KEEP AN EYE OUT FOR THESE RED FLAGS

- 1 The subject line Scammers tend to use an urgent or aggressive tone.
- 2 The sender In the example above, is the sender using a Gmail address? If you said yes, take a closer look! It's actually g-r-n-a-i-l.com. Sneaky scammers will use email handles that are one letter off from what they should be (e.g., "netftix" instead of "netflix") so that, at a glance, everything appears official.
- 3 The time stamp When was the email sent? This is an especially telling clue when a scammer is impersonating someone you know or correspond with regularly.
- The greeting Does it address you by name, by email address or by a generic title? A generic or awkwardly phrased greeting could be the sign of a scam.

- **5** The spelling Errors in spelling and grammar are always a red flag.
- 6 Buttons and links These are easy for scammers to format and disguise. Get in the habit of accessing your accounts by typing the official URL in a new browser window. Avoid using the direct links in your email messages.
- **7 The contact info** Does it look sketchy? If you need to verify the legitimacy of the sender, never use the contact information contained within the email. Cross-reference it with a separate web search.
- **3** Attachments Malicious files can be easily disguised as innocent Word documents, spreadsheets and presentations. Be deliberate about which attachments you choose to open or download.

#### **REPORTING EMAIL SCAMS**

Email phishing attempts (even the unsuccessful ones) can be reported here:

Canadian Anti-Fraud Centre www.AntiFraudCentre.ca

You should also advise the financial institution or other agency whose name was used in the phishing email.
